

INTERNATIONAL JOURNAL OF PHARMA PROFESSIONAL'S RESEARCH

Publication Ethics and Malpractice Statement

The prevention of publication malpractice is one of the important responsibilities of the editorial board. It is necessary to agree upon standards of expected ethical behavior for all parties involved in the act of publishing: the author, the journal editor, the peer reviewer and the publisher. Any kind of unethical behavior is not acceptable, and IJPPR do not tolerate plagiarism in any form. Authors submitting articles to Journal affirm that manuscript contents are original.

The following duties outlined for editors, authors, and reviewers are based on the COPE Code of Conduct for Journal Editors. Editors, authors, and reviewers will also adhere to the Journal's submission guideline policies.

Duties of Editor

1. **Publication Decisions:** Editors should evaluate manuscripts exclusively on the basis of their academic merit. An editor must not use unpublished information in the editor's own research without the express written consent of the author. Based on the review report of the editorial review board, the editor can accept, reject, or request modifications to the manuscript. The editor may confer with other editors or reviewers in making this decision.
2. **Review of Manuscripts:** Each editor must ensure that each manuscript is initially evaluated by the editor for originality, making use of appropriate software to do so. Following desk review, the manuscript is forwarded blind peer review to the editorial review board who will make a recommendation to accept, reject, or modify the manuscript.
3. **Fair Review:** The editor must ensure that each manuscript received by the Journal is reviewed for its intellectual content without regard to sex, gender, race, religion, citizenship, etc. of the authors.
4. **Confidentiality:** The editor and any editorial staff must not disclose any information about a submitted manuscript to anyone other than the corresponding author, reviewers, potential reviewers, other editorial advisers, and the publisher, as appropriate.
5. **Disclosure and Conflicts of Interest:** Unpublished materials disclosed in a submitted manuscript must not be used in an editor's own research without the express written consent of the author.

Duties of Authors

1. **Reporting Standards:** Authors should present an accurate account of their original research as well as an objective discussion of its significance. Manuscripts will follow the submission guidelines of the journal. A paper should contain sufficient detail and references to permit others to replicate the work. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are unacceptable.
2. **Originality:** The authors should ensure that they have written entirely original works, and if the authors have used the work and/or words of others that this has been appropriately cited or quoted.
3. **Multiple, Redundant, or Concurrent Publications:** Authors should not submit the same manuscript to more than one journal concurrently. It is also expected that the author will not publish redundant manuscripts or manuscripts describing the same research in more than one journal.
4. **Acknowledgement of Sources:** Authors should acknowledge all sources of data used in the research and cite publications that have been influential in the research work.
5. **Authorship of the Paper:** Authorship should be limited to those who have made a significant contribution to conception, design, execution or interpretation of the reported study. Others who have made significant contribution must be listed as co-authors. Authors also ensure that all the authors have seen and agreed to the submitted version of the manuscript and their inclusion of names as co-authors.
6. **Data Access and Retention:** Authors should provide raw data related to their manuscript for editorial review and must retain such data.
7. **Disclosure and Conflicts of Interest:** All authors should disclose in their manuscript any financial or other substantive conflict of interest that might be construed to influence the results or interpretation of their manuscript. All sources of financial support for the project should be disclosed.
8. **Fundamental Errors in Published Works:** If at any point of time, the author(s) discovers a significant error or inaccuracy in submitted manuscript, then the error or inaccuracy must be reported to the editor.

Duties of Reviewers

1. **Confidentiality:** Information regarding manuscripts submitted by authors should be kept confidential and be treated as privileged information.
2. **Acknowledgement of Sources:** Manuscript reviewers must ensure that authors have acknowledged all sources of data used in the research. Any kind of similarity or overlap

between the manuscripts under consideration or with any other published paper of which reviewer has personal knowledge must be immediately brought to the editor's notice.

3. **Standards of Objectivity:** Review of submitted manuscripts must be done objectively and the reviewers should express their views clearly with supporting arguments.
4. **Promptness:** Any selected referee who feels unqualified to review the research reported in a manuscript or knows that its prompt review will be impossible should notify the editor and excuse himself from the review process.
